BBA Aviation ERO Getting “Greener” through ISO 14001

Orlando, Florida...October 19, 2009...BBA Aviation Engine Repair and Overhaul (ERO) company Dallas Airmotive was found to be compliant in accordance with ISO 14001 by a third party registrar and has been recommended for ISO 14001 certification.

ISO 14001 is an international standard for environmental management systems (EMS) that enables an organization to identify and control the environmental impact of its activities, improve its environmental performance and implement a systematic approach to setting environmental objectives and targets. “ISO 14001 certification assures our customers, employees and those who we represent that we are an environmentally responsible organization that is in control of its processes and activities,” stated BBA Aviation ERO President Hugh McElroy.

“There is no substitute for sound environmental thinking and being ultimately responsible for our industrial impact on the global environment. Contributing positively to air and water quality, recycling and preserving our natural resources while engineering new “Greener” technology is a core value of our organization,” continued McElroy. “Investing in ISO 14001 helps us systematically institutionalize processes and procedures that assure our sustainability and demonstrate responsible corporate citizenship.”

BBA Aviation ERO has been certified for nearly a decade under ISO 9001:2000 – the international standard for quality management systems. “Both Quality and Environmental standards dovetail very efficiently,” according to McElroy. “We are dedicated to operating under both standards in all that we do.”

Additional information about BBA Aviation Engine Repair and Overhaul services can be found by calling +1 214-956-3001 in the U.S.A., +44 (0)23 9230 4000 in the U.K., or viewing the company website at www.BBAaviationERO.com.

(Note to Editors)

BBA Aviation’s engine repair and overhaul companies are primarily engaged in the repair and overhaul of gas turbine engines plus parts support. Under the name Dallas Airmotive, the company operates facilities at two locations in Dallas-Fort Worth metropolitan area plus its Premier Turbines division in Neosho, Missouri and its H+S Aviation affiliate in Portsmouth, England. Dallas Airmotive also maintains a network of Regional Turbine Centers across the United States, Brazil and in England. The combined companies form a world leading, OEM-authorized, independent provider of services for Pratt & Whitney Canada PT6A/T, JT15D, PW100, PW300, PW500 and PW901 APU; Rolls-Royce Spey, Tay and Model 250/T63/T703; General Electric CF34, CT7/T700, and J85; Honeywell TFE731, HTF7000, CFE738, ALF502L engines, and the Honeywell Model 36, 331-200/250 and RE100 series APUs; and the Hamilton Sundstrand T40-1 APU. In addition to its overhaul and repair facilities, BBA Aviation Engine Repair and Overhaul operates two parts supply companies: International Turbine Service (ITS) and Barrett Turbine Engine Company. Headquartered in Grapevine, Texas, the combined companies employ more than 1,100 personnel who service business aviation, regional airline, military and government agencies worldwide.
