**Dallas Airmotive do Brasil Experiences Rapid Growth in  
Honeywell TFE731 and APU Services**

Las Vegas, Nevada...October 9, 2011... Dallas Airmotive do Brasil, a BBA Aviation Engine Repair and Overhaul Group (ERO) company, has experienced rapid growth of its engine repair and support business since the addition of Honeywell TFE731 and 36 series APU authorizations in February, 2011. The company's Belo Horizonte facility is authorized by Honeywell for Major Periodic Inspection (MPI) and line maintenance of the TFE731 turbofan and line maintenance on 36 series APUs. In addition the facility provides line maintenance and hot section inspection services on Pratt & Whitney Canada PT6A and PW100 engines.

“Our recent success in Brasil is punctuated by the three contracts we signed during the August LABACE exposition in São Paulo,” commented Hugh McElroy, President of BBA Aviation Engine Repair and Overhaul Group. “These contracts covered everything from component repair to engine hot section inspections on PT6A, PW100 and TFE731 engines.

“The demand for our services from government, military and civil aviation customers has been significant,” added McElroy. “In recognition of this, we are considering options to increase capacity in the region.”

## **2-DALLAS AIRMOTIVE do BRASIL**

In addition to its on-site resources, Dallas Airmotive do Brasil has access to the full breadth of capabilities of Dallas Airmotive and the BBA Aviation Engine Repair and Overhaul Group. The ERO Group offers customers the benefits of a wide spectrum of products including spare parts and whole engine solutions including new, serviceable, rotatable and exchanges. AOG service activities are coordinated through ERO's FIRST SUPPORT center in Dallas with plans to add a regional FIRST SUPPORT satellite operation in South America in the future. FIRST SUPPORT utilizes state-of-the-art technology to plan and coordinate the logistics of AOG and field service support to provide the fastest and most efficient response to customer requirements.

The company also provides 24 hour field service support throughout South America. It is backed by one of the world's largest and broadest networks engaged in the overhaul and repair of turbine engines.

Dallas Airmotive is exhibiting during NBAA 2011 at BBA Aviation's Booth #3900. Additional information can be found on the company's website at [www.BBAaviationERO.com](http://www.BBAaviationERO.com).

### **(Note to Editors)**

BBA Aviation's Engine Repair and Overhaul group of companies is primarily engaged in the repair and overhaul of gas turbine engines and parts support. Operating under the names Dallas Airmotive, H+S Aviation and Premier Turbines, the combined companies form a world leading, OEM-authorized, independent provider of services for Pratt & Whitney Canada PT6A/T, JT15D, PW100, PW300, PW500 and PW901 APU; Rolls-Royce Spey, Tay and Model 250/T63/T703; General Electric CF34, CT7/T700, M601/H80 and J85; Honeywell TFE731, HTF7000, CFE738, ALF502L engines, and Honeywell Model 36, 331-200/250 and RE100/RE220 series APUs; and the Hamilton Sundstrand T40-1 APU. Dallas Airmotive operates facilities at two locations in Dallas-Fort Worth metropolitan area plus a network of Regional Turbine Centers across the United States, Brasil and in England. Premier Turbines is located in Neosho, Missouri. H+S Aviation is located in Portsmouth, England. In addition to its overhaul and repair facilities, BBA Aviation Engine Repair and Overhaul operates two parts supply companies: International Turbine Service and Barrett Turbine Engine Company and one component and accessory repair and overhaul company International Governor Services. Headquartered in Grapevine, Texas, the combined companies employ more than 1,000 personnel who service business aviation, regional airline, military and government agencies worldwide.
