**Andrew Woodworth Joins BBA Aviation Engine Repair & Overhaul
International Sales Team**

Dallas, Texas...January 9, 2009...Andrew Woodworth has joined BBA Aviation Engine Repair and Overhaul (ERO) as Regional Sales Manager for Australasia. Woodworth will provide sales and technical assistance on all 21 engine programs for which ERO is OEM authorized.

“Andy has a unique background in program management, strategic planning, and sales which makes him a valuable asset and a wonderful addition to our team,” commented BBA Aviation ERO Vice President of International Sales, Willy Harmon. “Andy worked with us at our H+S Aviation facility in England for many years before migrating to Australia. We welcome him back.”

Woodworth brings two decades of aviation sales and technical background to his new position. While attending college, he apprenticed with British Aerospace and afterwards was offered a position on the BAe 146 regional airliner program and progressively moved through positions of ever increasing responsibility. In late 1990s, he joined BBA Aviation’s H+S Aviation in Portsmouth, England as a Sales Engineer on the Rolls-Royce Dart program eventually becoming Business Manager for the entire program and overseeing engineering, production, purchasing, logistics, operations sales and customer support.

Most recently Woodworth worked for GE Aviation Systems in Australia as Turboprop and Rotorcraft Account Manager where he managed existing and developed new business.

Woodworth is a British national. He graduated from Macclesfield College with a degree in Aeronautical Engineering and post graduate attended Manchester University of Science and Technology under a British Aerospace-UMIST Fellowship. Woodworth resides in Australia and will cover that country as well as New Zealand, Papua New Guinea and the Pacific Islands.

Woodworth can be contacted at +61 0407 339585 or by e-mail at awoodworth@dallasairmotive.com. Additional information about BBA Aviation Engine Repair and Overhaul services can be found by calling 214-956-3001, or viewing the company website at www.BBAaviationERO.com.

(Note to Editors)

BBA Aviation's engine repair and overhaul companies are primarily engaged in the repair and overhaul of gas turbine engines plus parts support. Under the name Dallas Airmotive, the company operates facilities at two locations in Dallas-Fort Worth metropolitan area plus its Premier Turbines division in Neosho, Missouri and its H+S Aviation affiliate in Portsmouth, England. Dallas Airmotive also maintains a network of Regional Turbine Centers across the United States and in England. The combined companies form a world leading, OEM-authorized, independent provider of services for Pratt & Whitney Canada PT6A/T, JT15D, PW100, PW300, PW500 and PW901 APU; Rolls-Royce Spey, Tay and Model 250/T63/T703; General Electric CF34, CT7/T700, and J85; Honeywell TFE731, CFE738, ALF502L engines, and the Honeywell Model 36 and 331 series APUs. In addition to its overhaul and repair facilities, BBA Aviation Engine Repair and Overhaul operates two parts supply companies, International Turbine Service (ITS) and Barrett Turbine Engine Company. Headquartered in Grapevine, Texas, the combined companies employ more than 1,300 personnel who service business aviation, regional airline, military and government agencies worldwide. For more information, please visit www.BBAaviationERO.com.

BBA Aviation plc is a publicly held corporation traded on the London stock exchange. BBA Aviation serves two primary markets – Flight Support and Aftermarket Services and Systems. Flight Support includes refueling, cargo handling, ground handling and other services to business and commercial aviation customers. The Aftermarket Services and Systems activities include repair and overhaul of turbine engines, supply of aircraft parts, design, manufacture and overhaul of landing gear, aircraft hydraulics and other aircraft equipment. Operating companies and their subsidiaries include Dallas Airmotive, Signature Flight Support, ASIG, APPH, Premier Turbines, International Turbine Service, International Governor Services, Ontic, Barrett Turbine Engine Company, and H+S Aviation.
