**Dallas Airmotive Offers On-Site Engine Support
During Super Bowl XLV Operations**

**Mobile Response Teams Positioned at Strategic Airports During Super Bowl Week
Co-Hosts Super Bowl Parties for Flight Crews**

Dallas, Texas...January 26, 2011...BBA Aviation Engine Repair and Overhaul Group (ERO) will sponsor its company Dallas Airmotive to actively support business aircraft operators during Super Bowl week with field service technical personnel and mobile response vehicles at key area airports. Dallas Airmotive is OEM-authorized on more than 80% of the turbine engines in operation today on business aircraft.

“There are more than a dozen business aviation airports within a 60 minute driving radius of the Super Bowl site,” stated ERO President Hugh McElroy. “Our state-of-the-art FIRST SUPPORT center is ready to coordinate our mobile response teams in the event an operator needs help. We’ve pre-positioned mobile response vehicles and technicians at two of the high traffic business aviation airports – Dallas Love Field and Dallas Fort Worth International Airport. We have more than 20 additional technicians in the area on call and ready to help whenever and wherever we are needed.”

Dallas Airmotive’s FIRST SUPPORT center uses real-time satellite tracking of personnel, vehicles, tooling and engines to immediately respond and route technicians with repair equipment, parts and accessories to AOG events. The FIRST SUPPORT center has significantly reduced the time between a customer’s call and an agreed upon plan of action to only several minutes.

As part of the Super Bowl activities, Dallas Airmotive will co-host Super Bowl parties on Sunday, February 6 for flight crews at both DFW International Airport’s new Corporate Aviation Center and at the Love Field Signature Flight Support facility. “We never forget that during big events such as this the flight crews are often on standby and have to maintain their readiness,” commented McElroy. “We are pleased that we can be on hand with technical support if help is needed as well as taking the lead in hosting a relaxing environment for crews during what promises to be an extremely busy week.”

Aircraft operators can call **1-800-527-5003** or **214-956-3001** to reach the FIRST SUPPORT center.

(Note to Editors)

BBA Aviation's Engine Repair and Overhaul group of companies is primarily engaged in the repair and overhaul of gas turbine engines and parts support. Operating under the names Dallas Airmotive, H+S Aviation and Premier Turbines, the combined companies form a world leading, OEM-authorized, independent provider of services for Pratt & Whitney Canada PT6A/T, JT15D, PW100, PW300, PW500 and PW901 APU; Rolls-Royce Spey, Tay and Model 250/T63/T703; General Electric CF34, CT7/T700, and J85; Honeywell TFE731, HTF7000, CFE738, ALF502L engines, and Honeywell Model 36, 331-200/250 and RE100 series APUs; and the Hamilton Sundstrand T40-1 APU. Dallas Airmotive operates facilities at two locations in Dallas-Fort Worth metropolitan area plus a network of Regional Turbine Centers across the United States, Brazil and in England. Premier Turbines is located in Neosho, Missouri. H+S Aviation is located in Portsmouth, England. In addition to its overhaul and repair facilities, BBA Aviation Engine Repair and Overhaul operates two parts supply companies: International Turbine Service (ITS) and Barrett Turbine Engine Company. It also operates International Governor Services, a turbine engine control repair and overhaul company. Headquartered in Grapevine, Texas, the combined companies employ more than 1,000 personnel who service business aviation, regional airline, military and government agencies worldwide.
