**Dallas Airmotive do Brasil Sees Rapid Growth in
Honeywell TFE731 and APU Services**

São Paulo, Brasil...August 10, 2011...BBA Aviation Engine Repair and Overhaul (ERO) company Dallas Airmotive do Brasil has experienced rapid growth of its engine repair and support business since the addition of Honeywell TFE731 and 36 series APU authorizations in February, 2011. The company's Belo Horizonte facility is authorized by Honeywell for Major Periodic Inspection (MPI) and line maintenance of the TFE731 turbofan and line maintenance on 36 series APUs.

“The response by Brazilian operators to our TFE731 service has been nothing short of spectacular,” commented Hugh McElroy, President of BBA Aviation Engine Repair and Overhaul Group. “In less than six months since startup, our Belo Horizonte facility has performed work on dozens of engines both in our shop and through field service at our customer's facilities and FBO locations. We are honored by the South American operators who have quickly discovered our responsiveness and the value of our depth of expertise on these Honeywell engines.”

“The demand for our services from government, military and civil aviation customers has been significant and may soon require us to expand our facility. In recognition of this, we are considering options to include additional locations in the region,” added McElroy. “We have a highly skilled team of technicians, quality and engineering support at Belo Horizonte. Our highly qualified field service representatives, logistics and sales management dedicated to the region are closely linked with the facility in Belo Horizonte as well as our entire global engine overhaul network.”

2- Rapid Growth for Dallas Airmotive do Brasil

In addition to our on-site resources, Dallas Airmotive do Brasil has access to the full breadth of capability of Dallas Airmotive, H+S Aviation, Premier Turbines, IGS, Barrett Turbine Engine Company and ITS. We offer customers the benefits of a wide spectrum of products including spare parts and whole engine solutions including new, serviceable, rotatable and exchanges. AOG service activities are coordinated through our FIRST SUPPORT center in Dallas and we have plans to add a regional FIRST SUPPORT satellite operations in South America as we expand local capabilities. FIRST SUPPORT uses state-of-the-art technology to plan and coordinate the logistics of AOG and field service support to provide the fastest and most efficient response to customer requirements.

Dallas Airmotive will be exhibiting at the 2011 LABACE Conference and Exhibition August 11-13 at Booths 2009-2011-1012.

(Note to Editors)

BBA Aviation's Engine Repair and Overhaul group of companies is primarily engaged in the repair and overhaul of gas turbine engines and parts support. Operating under the names Dallas Airmotive, H+S Aviation and Premier Turbines, the combined companies form a world leading, OEM-authorized, independent provider of services for Pratt & Whitney Canada PT6A/T, JT15D, PW100, PW300, PW500 and PW901 APU; Rolls-Royce Spey, Tay and Model 250/T63/T703; General Electric CF34, CT7/T700, M601/H80 and J85; Honeywell TFE731, HTF7000, CFE738, ALF502L engines, and Honeywell Model 36, 331-200/250 and RE100/RE220 series APUs; and the Hamilton Sundstrand T40-1 APU. Dallas Airmotive operates facilities at two locations in Dallas-Fort Worth metropolitan area plus a network of Regional Turbine Centers across the United States, Brasil and in England. Premier Turbines is located in Neosho, Missouri. H+S Aviation is located in Portsmouth, England. In addition to its overhaul and repair facilities, BBA Aviation Engine Repair and Overhaul operates two parts supply companies: International Turbine Service and Barrett Turbine Engine Company and one component and accessory repair and overhaul company International Governor Services. Headquartered in Grapevine, Texas, the combined companies employ more than 1,000 personnel who service business aviation, regional airline, military and government agencies worldwide.
